

# FATECH VEGA DUO

CASSETTE PRINTER

COD.VEGA02-FT

**Description:** High resolution Laser histology cassette printer for alphanumeric characters, symbols and barcodes (Linear, Two dimension)

## Features

DUO is an automated cassette-collection device specifically designed to work with Fatech VEGA Laser cassette printer.

The unit is composed by a motor-controlled cassette dispensing system.

Marked cassettes can be delivered based on the LIS/Manual command to the right /left tray.

Each tray can be used by one technician, making of DUO the perfect marking solution to share between two grossing stations.

DUO allows the delivery of printed cassettes according the marking sequence.

VEAG DUO is a perfect solution designed for labs working both in a "batch and On-demand mode". At need one tray can be removed and the cassettes be delivered only in one direction.

Up to 18 cassettes are pre-printed and sequentially released on the trays.

In case of urgent need of a specific printed cassette it is possible to prioritise it over the printing cue.

A small transparent window (Lexan) allows the user to verify at any time the functionality of the delivery mechanism and identify wether a jam occurred.

**Printing technology:** Laser (2,0 W). Permanently printed cassettes are resistant to commonly used solvents and to trimming procedures after inclusion in paraffin.

**Printing resolution:** 600 dpi grants 99,5 % Datamatrix identification

**Cassette capacity:** 360 cassette (6 colors)

**Printing color:** Monochromatic, Black

**Printing speed:** 10/12 cassette/minute

**Communication ports:** USB

**Dimensions:** 240x520x520 mm

**Weight:** 25 kg

**Power supply:** 110/220Volts 50/60Hz

**Power draw:** 4,0 A
